

Douglas Brown PR Environmental Policy

Douglas Brown believes that he has a responsibility to care for and protect the environment in which he operates.

Douglas Brown is fully committed to improving environmental performance across all of his business activities, and will encourage our business partners and members of the wider community to join us in this effort.

Douglas Brown PR recognises the key impacts to be in the areas of :

- energy use
- raw material use
- waste generation
- water use
- transport

Douglas Brown PR will strive to:

- Adopt the highest environmental standards in all areas of operation, meeting and exceeding all relevant legislative requirements.
- Assess our organisational activities and identify areas where we can minimise impacts.
- Minimise waste through careful and efficient use of all materials and energy.
- Purchase sustainable products wherever feasible [e.g. recycled, FSC or low environmental impact products and energy from renewable sources].

Ensure all waste is sorted for recycling with all paper (other than that carrying confidential information) being recycled.

- Follow an environmentally sound transport strategy, using public transport when practical and minimising emissions from car travel when public transport is not viable.
- Continually assess the environmental impact of all operations.
